

What is required to cross the border to Poland?

To cross the border into Poland, you will need a number of necessary documents, including a passport, a valid visa, a health insurance contract and an invitation from a Polish employer.

Gathering all these documents can be time consuming and not always an easy task. We offer our help to make this process quick and easy. We will find tempting offers from foreign companies for you, which will save you from having to look for a job on your own. Even if you already have a visa, we can help you find even better job opportunities, and if your chosen job is not suitable, we can help you change it. Our team is committed to long-term cooperation and will insist on the continuation of the employment contract and work visa. In addition, after the permitted period of stay has expired, we will help you obtain a long-term invitation and a permanent residence permit in Poland.
